

International cooperation on nuclear data for basic sciences and applications at the IAEA

Paraskevi (Vivian) Dimitriou Nuclear Data Section, International Atomic Energy Agency, Vienna, Austria

How did it all start?

- Eisenhower's historical speech "Atoms for Peace" on 8 December 1953
- First International Conference on Peaceful Uses of Atomic Energy, Geneva, 1955

- UK, USSR and US discuss making nuclear data public at Geneva conferences 1955, 1958
- Carl Westcott was hired in 1963 by the Agency to oversee the Nuclear Data Program
- International Nuclear Data Committee guides the Nuclear Data Section in promoting research and exchange of data among member states

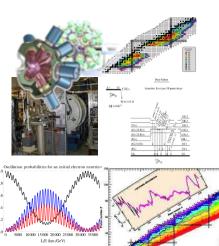

Nuclear Data Section

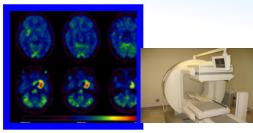

- Develops nuclear data worldwide through networks and international coordinated projects
- Promotes research through international cooperation (coordinated research projects, technical meetings)
- Enhances capacity building through training workshops and mentoring schemes
- Disseminates databases, reports and technical documents online and offline to all 174 member states

Nuclear Data for Basic Science and Applications

Radiation Safety

Medicine

Cultural Heritage

Energy

Basic Research

IAEA Networks

- Nuclear Reaction Data Centers (NRDC) since 1975:
 13 data centers maintaining EXFOR exp. nuclear reaction data
 - USABNL, NEA Data Bank, IAEA, Russia (3), China, Hungary, Japan (2), Korea, India, Ukraine

- Nuclear Structure and Decay Data (NSDD) since 1976:
 17 data centers contributing to ENSDF database
 - USA (ANL, BNL, FRIB/MSU, LBNL, ORNL, TAMU, TUNL),
 Australia, Bulgaria, Canada, China (2), Hungary, India, Japan,
 Romania, Russia

- International Nuclear Data Evaluation Network (INDEN) since 2018: international cooperation on nuclear reaction data evaluation
 - USA (BNL, LANL, LLNL, Notre-Dame, ORNL, RPI), IAEA,
 JRC/EU, Austria, Czech Rep., China, France, Germany, Greece,
 Japan, Slovenia, Spain, Switzerland, Romania, Russia

INDEN - International Nuclear Data Evaluation Network

Network managed by the International Atomic Energy Agency

Coordinated Research Programs

- 3-4-year international projects aimed at promoting research and addressing data needs for basic science and applications
- Outputs include databases, data files, IAEA reports, and publications in international peer-reviewed journals
- US national labs and academic institutions have and are making important contributions to these projects but they are also benefiting from them (

CRPs completed

- Reference Database for beta-delayed neutron emission:
 - comprehensive compilation of experimental $T_{1/2}$, P_n data; recommended values; systematics; models;
 - compilation of; systematics and recommended aggregate data: total delayed neutron yields, 6- and 8-group constants
- Photonuclear Data Library and Photon Strength Functions:
 - Updated recommended photonuclear cross sections and spectra
 - Compilation of Photon Strength Functions (photonuclear; neutron capture; chargedparticle reaction; NRF); global models
